### **DETAILED ACTION**

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of the record teaches the method and the apparatus for centralized control in a material handling system; however, the prior art of the record particularly fails to teach or fairly suggest in combination with the other elements and features of the claimed invention regarding claims 1-10 and 15-16, a control system and an apparatus for a material handling system having a first control module, a second control module, and a third control module, said first control module comprising: a first control cabinet for providing primary control to said first control module and said control system; a first external component for controlling an equipment component of the material handling system and said first control module having primary control of said second control module and said third control module, said first control module being interconnectable and interoperable with said second control module and said third control module such that said second control module may assume operational control of said third control module in the event that said first control module is removed from said control system and regarding claims 11-14, a method for controlling a material handling system, said method comprising the steps of: providing a predetermined quantity of control modules for controlling respective parts of the material handling system; adding an additional part to the material handling system for increasing capacity of the material handling system; adding
